

TECHNICAL DATASHEET

POLICARBONATE PROFILES U AND H

The finish profiles U and union profiles H from Polimer Tecnic are manufactured in polycarbonate of the highest quality and have a high protection against UV rays, which guarantees a long life in exterior use without yellowing. The H profiles are used as a junction and the U profiles as the top of the cell polycarbonate plates. They comply with the norms and requirements necessary for the correct construction and functionality, and are the perfect complement for the assembly of cellular Vitroflex PC boards.

DESIGN

PROFILE H UNION

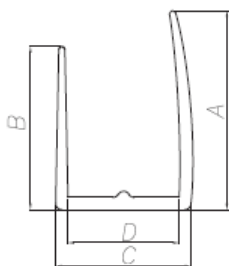

MEASURES

	H4	H6	H8	H10	H16	H20	H25	H32	H40
A*	55	63	67	72	97	118	113	126	127
B	44	51	49	57	75	80	92	112	110
C	7,5	9,7	11,2	13	20	27	30	37	46
D	4,8	6,9	8,5	11	17	20	27,5	33	41

Tolerances A and B +/- 3mm C and d +/- 0,5mm
